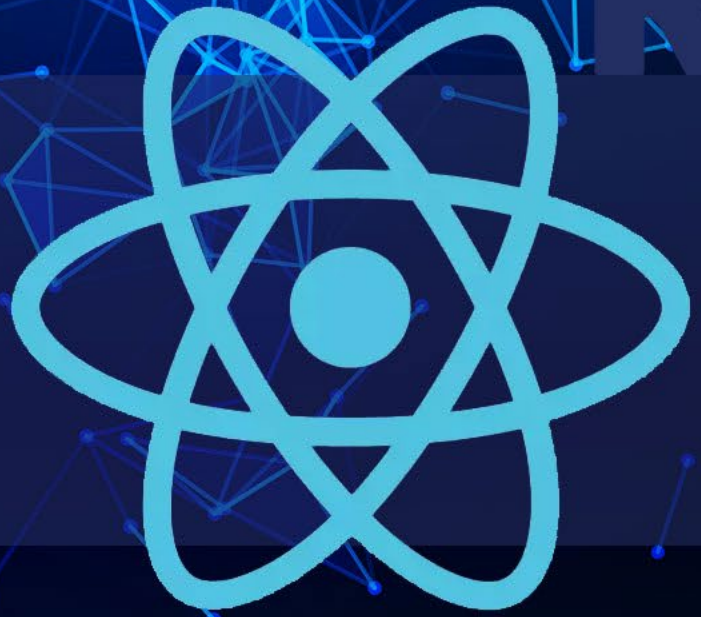
React Native



React Native

Hands On Workshop

By Vijay Shivakumar

What you need to know

- Basic UI knowledge
- HTML5 CSS3
- JavaScript
- ReactJS understanding props, state etc.
- NodeJS

Apps built with React Native

React Native

- Facebook
- Instagram
- Uber Eats
- Skype
- Pinterest
- AirBnB
- Discord and many more

Why and why not React Native

Why not

- Few components in library
- If your app needs Bluetooth, accelerometer and other device apis
- Your app churns large amount of data
- Gaming apps with heavy animation
- Don't know React and JS

Why

- Code reusability between web and mobile app
- Developers can pick from 3rd party library as needed
- Camera, push notification
- Cost effective development
- Large community support
- Leverage on existing JS knowledge

What your system must have

React Native

NodeJS

Admin Privileges to install modules as needed

Android Studio follow installation configuration on https://reactnative.dev/docs/environment-setup

X-code on mac

https://reactnative.dev/docs/environment-setup

What is Expo?

Expo

A framework and a platform

We write React Native and JavaScript code,

Expo handles all the nitty-gritty details for building iOS & Android applications

You don't need Xcode or Android Studio

The Expo platform runs online

It has worker servers that build apps for you

Expo platform has four primary developer tools

Expo client : installed on your device to debug app

Expo CLI : create, develop and test on device.

Publish project,

Objectives

- Components overview
- Layouts
- Working with lists
- Develop re-usable components
- Forms and data

Components

Components split the UI to maintainable and reusable pieces

Components are independent

Easier to write, maintain, update and test

Agnostic about platforms (Android, IOS, and TVos)

Components

React Native

Basic Components

- View
- Text
- StyleSheet
- TextInput
- Image
- BackgroundImages
- ScrollView

User Interface

- Button
- Switch

List View

- Flat List
- Section List

Android Components

- BackHandler
- DrawerLayoutAndroid
- PermissionsAndroid
- ToastAndroid

iOS Components

- ActionSheetIOS

Other Components

- ActivityIndicator
- Alert
- Animated
- Dimensions
- KeyBoardAvoidingView
- Linking
- Modal
- PixelRatio
- RefreshControl
- StatusBar

Thank you all
